

Hiya my name is Jordan and I am a Young Commissioner for Calderdale Council I'm a DJ and enjoy entertaining my customers. I like working with others and try helping other people out and I'm here to share my view about coronavirus.

Coronavirus is a very serious matter and is making a lot of people suffer and a lot of people have died due to this virus. This virus was discovered December 2020 by a guy in china. Now this virus has spread round the world and affecting so many people also this virus has also got to Boris Johnson which is our Prime Minister. Boris Johnson put us on lockdown 23<sup>rd</sup> of March 2020 and since then our lives have gone downhill.

The thing what worries me the most is that we don't know when this lockdown is going to end this is could go on for ages. Lockdown means we can't go outside, we can't go to the shops unless it's for essentials, we can't see any of our family and friends, the only people we can see is the people what are in the house with us now. Schools have been shut and can't open till lockdown has finished lots of people have stopped working except front line workers. If someone in your family is ill and has to go into hospital and they are sadly passing away we can't go in to say our last goodbyes.

So, to bring the number of people getting the virus down people are staying in homes and only going out for essentials, they are also staying away from other family members and strangers when walking in the street they should be 2m apart as Boris Johnson told us. People are also washing there hands more frequently like when they have been or going into work, when they get home from the supermarket, also when they sneeze or cough, they cough into a tissue and then throw it straight in the bin, also before eating or handling food. CATCH IT, BIN IT, KILL IT. Supermarkets are also following the 2m rule by putting a line of tape every 2m in the supermarket this means customers should stay 2m apart whilst shopping around the centre, supermarkets are also limiting the amount of people that go into the store and making people queue outside.

### **My review on covid 19 and how it is affecting me.**

Covid 19 is a very serious matter and people are getting their lives taken away to quickly and this needs to slow down and at some point, come to a stop. Boris Johnson has put the UK on lockdown and I think this is a good thing because he is urging people to stay in doors and it is helping because the news says that deaths and cases are decreasing for covid 19

Now this has affected me pretty bad, since Boris Johnson put us on lockdown I have had to stop DJing, and cancel all my recent parties which means I have lost money and aren't getting any income even though I still have to pay for my insurance for my gear and that costs some money! This is a pain for me because I don't know when lockdown is going to end and I can't cancel my insurance.

On the other hand I am doing okay, I have got to sort out all my gear and upgrade to some new gear I have also been able to have some time off on the weekends and chill out and it also means I can go to bed at a right time and not going to bed late after work. To keep me feeling good I'm producing live shows on my Facebook feed which is getting 4k views and 9,799 people seeing it on their feed now this is good for me because it has got me knowing

that my stuff actually gets around and the music I am sharing is lifting peoples moods . If you are interested and want to see and hear what I'm doing you can follow this link:
